

Technical Regulations Analyst

工作职责

The Technical Regulations Analyst is responsible to evaluate and document relevance of Legal Technical Regulations, Standards for Group Sector and/or BA product portfolio in alignment with affected Segments, Markets, Products and/or Projects. If required, the TRA also enriches the analysis documentation according to organizational, product, project and/or process specific needs. This can also be, for example, a singularization of certain relevant requirements and make them usable Requirements Objects with relevance for a specific Product, Project and/or Process.

The TRA leads the prevention of risks for the entire corporation and all employees from potential technical non-Compliances (“license to operate”). They also deal with growing regulatory complexity for products and product-related services in all relevant markets by analyzing relevant LTRs/ Standards.
