

R&D Digital Business Processes Developer (Digital Products)

Náplň práce

In your position as "R&D Digital Business Processes Developer (Testing)" you are responsible to develop and improve our R&D business processes and strongly support the digitalization with coding to increase efficiency and transparency. You enable workflows for the R&D departments and drive the automatization of data collection. In your role you work with internal and external service providers and support the implementation of AI methodology.

Main tasks:

- Digitalization of processes and enhancing existing processes (including problem-solving and debugging);
- Developing WebApps by programming frontend and backend;
- Automatization of business processes;
- Work with external Software providers;
- Develop customized solutions like web-based workflows for the R&D Departments;
- Working with developing databases like SQL, MongoDB, and Influx;
- Design, develop, and maintain database structures;
- Manage accessibility to allow usage;
- Keep versioning up to date;
- Handling backup and information loss processes;
- Design complex database queries for later analysis;
- Setup and build up of a central Testing Database ;
- Data refinement, processing, and analysis with visualization, e.g Testing and LIMS;
- Enable systematic collection of process data through R&D Testing areas;
- Support the implementation of AI methodology in material and technology area ;
- Work effectively in a team and communicate with stakeholders to plan, develop, and optimize applications;
- Create a network of people with digital skills;
- Organize ways to distribute knowledge.

Profil kandidáta

We are looking for:

- Academic degree in Computer Science, Economics or an equivalent qualification
- IT Digitalization, Data Analytics and Cybersecurity;
- Coding Language like Python and frontend CSS;
- Databases like SQL (MySQL, MariaDB), MongoDB, Influx;
- System Know-how with Customer and User centricity ;
