

New Product Launch and Serial Life Manager

Your tasks

As a New Product Launch and Serial Life Manager, your daily activities will be:

- Lead manufacturing-related activities of complex industrialization projects within the Product Life Cycle, from acquisition until the start of series production and from the start of series production throughout the project's lifetime.
- Develop the Manufacturing Concept based on product architecture and requirements matching them to state-of-the-art production processes and technologies.
- Be responsible for completing activities within operations to meet the specific, cost, timing, and quality requirements.
- Be responsible for documentation of operations activities.
- Actively manage and optimize the use of resources in the project, and assign activities to the operations project team members.
- Coordinate and control project activities, track the project progress, and define corrective measures.
- Ensure spending and investments are aligned with approved authorizations and/or budgets.
- Ensure technical, timing, and cost feasibility to manufacturing processes to eventual changes in product or requirements and lead change management activities in production related to product or process
- Promote continuous improvements for products, processes, and projects in your area of responsibility.
- Provide support in quality tasks to analyze, contain, and resolve issues during launch and serial production.
- Coordinate and manage prototype sample production activities.
