

Global Smart Supply Chain Implementation

Your tasks

We are seeking a dynamic professional for the role of Global Smart Supply Chain Implementation in APAC Region. This position plays a crucial role in standardizing our production planning processes through the implementation of SAP PP functionalities.

- Lead the end-to-end implementation of smart supply chain solutions
- Develop and execute project plans for integrating SAP PP into existing supply chain operations
- Collaborate with cross-functional teams to identify areas for improvement and implement data-driven solutions
- Analyze specific business requirements and ensure localization of the standard template to meet business requirements
- Define correct master data and training to meet specific business needs

Your profile

- Degree in economics, business management, business informatics or engineering (university or university of applied science)
- Many years of professional experience in Supply Chain Management (SCM) in different functions
- Several years of experience in international project management as well as project management experience in major SCM projects
- Excellent SAP know-how (PP, SD and MM modules)
- Demonstrated skills in process optimization and change management
- Strong analytical and problem-solving abilities with keen attention to detail
- Excellent communication and leadership skills, with the ability to influence stakeholders at all levels
- Willingness to travel internationally as required for project implementation

Our offer

We want our employees to do well with us. That's why we offer them not only an exciting job in an international technology group, but also numerous additional offers such as flexible and hybrid working, sabbaticals and other benefits.

Note : This position will be for 1 year contract on the payroll of contitech!
