

Industrial Engineering Manager

หน้าที่ความรับผิดชอบในงานของคุณ

Responsibilities:

1. Lead Industrial Engineering (IE) functions and projects to achieve overall productivity and quality goals in the PJ plant.
2. Establish and maintain work standards, including implementing standardisation methods to increase operational efficiency.
3. Conducting motion and time studies to improve operator efficiency and reduce set-up times
4. Optimise work and factory layout, i.e. review and improve layouts for all sections and enhance storage and material handling activities to reduce waste and improve safety.
5. Manage and evaluate work organisation structure. Propose and establish appropriate work organisation for the plant and streamline systems and methods by removing non-value-added activities.
6. Plan and propose overall plant headcounts for variables and conduct manning requirements studies and re-engineer utilisation as necessary.
7. Prepare reports on productivity and efficiency and lead improvement activities and participate in Continental Business Team reviews.
8. Organise and lead IE-related tasks. Promote and implement productivity and efficiency initiatives
9. Support the Company's safety and health policy and ensure compliance with all procedures.
