

Hydraulic Hose Development Specialist - Greenfield

Feladatok

The ContiTech group sector develops and manufactures, for example, cross-material, environmentally friendly and intelligent products and systems for the automotive industry, railway engineering, mining, agriculture, and other key industries. Guided by the vision of “smart and sustainable solutions beyond rubber,” the group sector draws on its long-standing knowledge of the industry and materials to open new business opportunities by combining various materials with electronic components and individual services.

ContiTech, a division of Continental, is one of the world’s leading suppliers of technical elastomer products and is a specialist in plastics technology. ContiTech develops and produces functional parts, components, and systems for machine and plant engineering, mining, the automotive industry, and other important industries. We are seeking a **Fluid Handling Solutions Hydraulic Hose Product Development Engineer** to join our team.

Develop new and innovative fluid handling solutions for hydraulic hoses and assemblies

Coordinate sample and prototype building process, including documentation.

Support the local supplier development process (Product Evaluation).
Manage Individual Projects.

Responsible for the design and implementation of hydraulic fluid handling solutions.

This includes the development of tools and processes to support new technology.

Lead Fluid Handling Hydraulic Hose Product Development projects.

Support Product Development projects and tasks as team member.

Provide support to other functions & departments as a Product Development team member.

Exchange know how throughout regional and global locations.

Support global standardization and consolidation of product specifications .

Develop hydraulic hose, fittings and assembly specifications to define materials and process steps for building prototypes and final products.

Define and specify tooling as required.

Develop new hose and fitting constructions to improve hose functionality and performance.

Obtain the materials for producing sample hose, fittings and assemblies to fulfill the project/customer requirement.

Ensure project plans are defined to reach the Product Development project targets. Regularly review status of projects for timeliness and completion of requirements.
