

Specialist - Financial Consolidation and Reporting (m/f/diverse) - REF73004X

Your tasks

The expert will support the setup and continuous operation of the group consolidation and reporting system for the future standalone automotive sector. This role involves global coordination and management of change processes related to group financial statements and reporting. The Specialist will work closely with senior team members, manage budgets and ensure compliance with internal and external reporting requirements.

- **System Support:** Ensuring the functionality and continuous development of the group consolidation & reporting system
- **Stakeholder Coordination:** Managing stakeholders and consult departments on system-related issues
- **Feasibility Studies:** Conducting feasibility studies for implementing solutions to business requirements
- **Concept Development:** Developing and implementing business concepts for the consolidation & reporting system in collaboration with departments
- **IT Implementation:** Translating business concepts into IT solutions and oversee their implementation together with IT
- **Problem Analysis:** Analyzing and resolving technical and business issues during the reporting process
- **Process Optimization:** Continuously optimizing processes and application components
- **Knowledge Transfer:** Providing application knowledge to users and coordinating with internal and external project staff
- **System Responsibility:** Acting as a contact for the overall consolidation & reporting context to ensure professional system administration and application maintenance
- **Data Management:** Maintaining master data within the system and ensuring the timely availability and high quality of monthly, quarterly, and year-end reports
- **User Support:** Ensuring structured global user support and prioritizing critical processes
- **Training:** Developing and conducting international training sessions for all user classes
- **Budget Management:** Planning and monitoring the budget for external consultants and control ongoing costs together with IT
- **External Communication:** Managing cross-company exchanges through an extensive expert network to ensure the competitiveness of software solutions together with IT
- **Strategic Development:** Monitoring the market environment and defining the strategic direction of consolidation and reporting solutions
