

Project Engineer

Vaše náplň práce

We are seeking a highly skilled and motivated Project Engineer to join our team in Kesurdi, India. As a Project Engineer, you will play a crucial role in managing and executing technical projects, ensuring they meet quality standards, timelines, and budget requirements.

- Lead and coordinate engineering projects from conception to completion, ensuring adherence to technical specifications, quality standards, and project timelines
- Develop project plans, including resource allocation, budgeting, and scheduling
- Collaborate with cross-functional teams, including design, R&D, and production, to ensure seamless project execution
- Manage and coordinate with customers, suppliers, and other external and internal stakeholders
- Conduct regular project status meetings and provide updates to senior management
- Identify and mitigate potential project risks and implement appropriate solutions
- Ensure compliance with safety regulations and quality standards throughout the project lifecycle
- Analyze project data and prepare comprehensive reports on project progress, challenges, and outcomes
- Contribute to continuous improvement initiatives by identifying and implementing process enhancements
- Stay updated on industry trends and emerging technologies to drive innovation in project execution

Váš profil

- Bachelor's or Master's degree Engineering (best in Chemical-, Plastic- or Process Engineering)
- Minimum of 5 years of working experience
- At least 3 years of experience in managing automotive projects
- Proficiency in project management methodologies and tools
- Strong technical knowledge of plastics chemistry and processing
- Expertise in MS Office and Project tools like Gant charts
- Excellent problem-solving skills and ability to think analytically
- Strong communication and interpersonal skills, with fluency in English
- Experience with budgeting and cost control in project management
- Ability to read and interpret technical drawings and specifications
- Knowledge of safety regulations and quality standards in automotive projects (PPAP)
- Willingness to travel occasionally to project sites and customers as required
- Demonstrated ability to work collaboratively in a team environment
- Strong organizational skills and attention to detail
