

SQM SCS Senior IC Assembly Series Production (SP) Engineer

Descrição da função

- Manage supplier quality for dedicated OSAT (Outsourced Semiconductor Assembly and Test) providers, including performance tracking, 8D management, and yield improvements.
- Oversee product lifecycle management, including PLC/MLC gate releases, manufacturing releases, and annual re-qualifications.
- Lead product and process change management, evaluating supplier changes and coordinating release processes within Continental.
- Ensure compliance with automotive quality standards (IATF, VDA) and implement zero-defect strategies at OSAT suppliers.
- Support sourcing activities for AESS-specific suppliers, including maturity evaluations and supplier component reviews.
- Drive continuous improvement programs for supplier quality processes, guidelines, and systems.
- Manage escalations for component and manufacturing-related quality topics, both internally and externally.
- Conduct VDA 6.3 audits for technology development and manufacturing processes at AESS suppliers.
- Support the development of AESS-specific tools and processes for quality management, including PCN/PTN management, MRB management, and qualification according to AEC-Q100.
- Collaborate with cross-functional teams to define and implement category quality requirements and improvement programs.
- Develop and implement supplier performance metrics and scorecards to track and improve OSAT provider quality.
- Conduct regular supplier audits and assessments to ensure compliance with Continental's quality standards and industry regulations.
- Collaborate with R&D teams to provide input on new product designs from a manufacturability and quality perspective.
- Implement and maintain a robust supplier corrective action system to address quality issues promptly and effectively.
- Lead cross-functional teams in root cause analysis and problem-solving activities for complex quality issues.
