

Test Engineer Force & Moment (m/f/d) - REF75964P

담당 업무

We are seeking a highly skilled Test Engineer Force & Moment to join our team in Hanover, Germany. In this role, you will be responsible for designing, conducting, and analyzing force and moment tests for our cutting-edge products in the automotive industry.

- Design and set up test methods for force and moment measurements
- Develop and implement test plans and procedures
- Operate and maintain sophisticated test equipment and data acquisition systems
- Conduct force and moment tests on flat-trac systems
- Analyze test data using statistical methods and specialized software
- Prepare comprehensive technical reports and present findings to cross-functional teams
- Collaborate with design engineers to improve product performance based on test results
- Ensure compliance with industry standards and regulations
- Continuously improve testing methodologies and processes
- Support development of software tools for test preparation and data analysis
- Troubleshoot and resolve technical issues during testing

지원자 프로필

- Academic degree in Mechanical Engineering, Natural Sciences, or related field; Master's degree preferred
- Several years of experience in tire development or tire testing
- Proficiency in force and moment testing methodologies and equipment
- Experience with statistical analysis software (e.g., MATLAB, Python)
- Understanding of vehicle dynamics or tire mechanics
- Knowledge of sensor technologies and instrumentation
- Experience with test equipment operation and maintenance
- Fluent German and English language skills (written and spoken)
- Strong analytical and problem-solving skills
- Attention to detail and ability to work in a fast-paced environment
- Excellent communication and teamwork skills
- Willingness to travel occasionally to other test machine locations

Applications from severely disabled people are welcome.
