

# IT Data Architect (m/f/d) BA OESL - REF76553X

## Jūsų užduotys

### Data Architecture

- Design, implement and manage OESL's data architecture to ensure secure, scalable and high-performance data processing for data analytics use-cases.
- Shape OESL's data architecture strategy, striking the perfect balance between cost, flexibility, performance, and innovation.
- Lead the evaluation, selection, and seamless integration of cutting-edge data warehousing technologies, tools, and services.

### Implementation and Optimization

- Deploy and manage data integrations across systems based on industry best practices to ensure performance and availability targets are met.
- Continuously enhance data processing chains by optimizing performance, reducing costs, and strengthening security measures.

### Governance and Compliance

- Ensure data architectures adhere to regulatory requirements and security standards such as ISO and GDPR.
- Develop and enforce governance frameworks for relevant resources, emphasizing data privacy, access control, and compliance.

### Collaboration and Stakeholder Engagement

- Partner with cross-functional technical leaders to align data strategies with business objectives.
- Collaborate with DevOps, Security, and Infrastructure teams to drive seamless adoption and integration of cloud services across OESL.
- Maintain strong relationships with external service providers, staying ahead of emerging trends and technologies.

Hiring can take place at different OESL IT Locations

## Reikalavimai

We're seeking a skilled **Data Architect** to lead the implementation of OESL's data strategy. Key skills and expertise include:

- **Data Driven Applications:** Experience with design, setup and operation of data integration workflows and ETL processes across multiple systems (e.g. ERP, CRM, IoT Data Sources)
- **Data Platforms:** Experience with usage and optimization of business warehouses. Preferably, based on SAP BW or Databricks.
- **Cloud Platforms:** Experience with AWS or Azure and designing scalable, secure data driven applications using cloud technology.
- **Data Governance & Security:** Familiarity with central regulations (e.g.

Ready to drive with Continental? Take the first step and fill in the online application.

## Apie mus

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent, and affordable solutions for vehicles, machines, traffic and transportation. In 2023, Continental generated sales of €41.4 billion and currently employs around 200,000 people in 56 countries and markets.

Guided by the vision of being the customer's first choice for material-driven solutions, the ContiTech group sector focuses on development competence and material expertise for products and systems made of rubber, plastics, metal, and fabrics. These can also be equipped with electronic components in order to optimize them functionally for individual services. ContiTech's industrial growth areas are primarily in the areas of energy, agriculture, construction, and surfaces. In addition, ContiTech serves the automotive and transportation industries as well as rail transport.
