

Purchasing Suite: Rollout Specialist | Business Partner Specialist

Ihre Aufgaben

Continental Purchasing Suite project is a global project targeting in designing, selecting, and implementing a group wide highly integrated digital purchasing platform solution that covers end-to-end processes from Source to Supplier Management for both Raw Material and Indirect Material, and the Purchase to Pay for Indirect Material.

The Tires Purchasing Area is looking for 6 team members, located in Lousado (Portugal) to support the roll out and future support of Purchasing Suite. Position are: Business Partner Specialist (3) and Purchasing Suite Rollout Specialist (3).

The Business Partner Specialist is responsible for the governance of all Business partner management process and deploying & maintaining solutions required for these processes. As a Business Partner management specialist, your role is to support all activities from the business side and contribute to the project in design, build as well as implementation, rollout, training, and further development activities of the Purchasing Suite after its initial go live.

The Purchasing Suite Rollout Specialist, is responsible for the Purchasing Suite module rollout activities (implementation phase) from the business side and contribute to the workstreams in design, build as well as implementation, rollout, training, and further development activities of the Purchasing Suite after its initial go live. Represent the interface between the users (Purchaser, Supplier, Account Payable etc.), the IT and the Implementation Partner, act as internal consultant to ensure best usage of future process and Purchasing Suite platform.

Purchasing Suite Implementation Activities:

- Get trained on Jaggaer solutions to be fully skilled in configuring the designed functions;
- Project management and coordination of the Purchasing Suite implementation in assigned locations/regions and purchasing categories/clusters;
- Analyze local processes and potential deviations from standard (Fit-Gap-Analysis), work out recommendation based on fit-gap-analysis result;
- Coordinate and tracking the collection of the implementation data and templates;
- Configure the Purchasing Suite solution with designed processes and templates;
