

# Laboratory Manager

## Vaše náplň práce

### Position Summary

#### Main job functions

Managing the Laboratory function of the Company to ensure that it provides timely and accurate information to the Technical and Operations Departments. Liaising with the Purchasing function in relation to the performance of suppliers quality through the inspection of incoming goods. Be pro-active in supporting and developing improvement projects within the department.

### Principle Accountabilities

#### Duties, Responsibilities and Key Tasks

Supervision of the Laboratory Technicians.

Ensuring that Goods received by the Company are assessed for their suitability for use in compliance with the relevant documented procedure.

Ensuring that all test methods are carried out in accordance with international standards or approved and documented procedures.

Ensuring that the hose adhesion tests required to certify our products are performed and reported in a timely manner.

Ensuring that customers and their representatives are accommodated in an appropriate manner whilst in the Laboratory.

Review and report on the performance of the Polyurethane pouring department.

Ensure that all Laboratory reports are satisfactorily completed and circulated within an appropriate timescale of the request for work.

Maintenance and monitoring of all Laboratory test data within WinSPC database and to alert relevant staff to concerning trends.

Maintaining the calibration status of all equipment used within the Laboratory.

Liaising with those requesting work to ensure a suitable methodology is defined and that timescales are agreed. Timely reporting of any deviations against these agreed plans.

Supporting the various departments of the Company in investigation, reporting and closure of corrective actions, improvement notices, incident reports and other audit findings, where appropriate.
