

Software Engineer - Fullstack

Your tasks

Overview:

As a Full Stack Software Engineer, you will work alongside a talented team to develop, enhance, and maintain cutting-edge software solutions for both internal tools and client-facing applications. You'll be involved in all aspects of the software development lifecycle, from conceptualization to deployment and beyond.

Core Responsibilities:

- Develop, enhance, and maintain our software solutions, ensuring high-quality, efficient, and scalable code.
- Conduct thorough requirement analysis to understand client needs and translate them into technical specifications.
- Design, implement, and optimize both frontend and backend components of our applications.
- Perform rigorous testing, debugging, and troubleshooting to ensure optimal performance and reliability of our software.
- Stay updated with the latest industry trends and technologies, recommending and implementing improvements to our tech stack as needed.
- Optimize application performance, responsiveness, and database efficiency.
- Provide technical guidance and mentorship to junior developers when required.

Your profile

Qualifications:

- Bachelor's Degree in Informatics Engineering, Computer Science or similar.
- Solid knowledge of C# and .Net Core
- Solid knowledge of Front-end framework (e.g., Angular/React)
- Solid knowledge of API Development
- Solid knowledge of Software Architecture like Micro-Services
- Fluent in English
- Familiarity with Code Compliance and Best Practices
- Familiarity in collaboration methods and tools (e.g., Agile and Git)
- Cloud experience - Nice to have
