

SAP ABAP and PM/PP Consultant (Techno-Functional)

Your tasks

The group Planning within the Automotive IT Competence Center - Business Applications (IT BA) is responsible in the process areas of master data maintenance, short term production planning and manufacturing execution. We are currently looking for a techno-functional Plant Maintenance/Production Planning to support us in the following tasks:

- Conduct system analysis and provide relevant PM and/or PP system configuration (customizing) according to business requirements
- Design and develop ABAP programming requirements within the functional modules of PM and PP
- In-depth analysis and debugging of existing programs, interfaces and Web Dynpro ABAP applications
- Participate and execute the required activities during the different phases/milestones of project implementation: fit-gap blueprint design, realization, UAT, cutover and hypercare
- Coordinate requirements and define concepts/solutions for the relevant business processes together with global competence center, local management and key-Users
- Provides functional and technical support and implement solutions
- Execute systems testing in accordance with the activity timetable
- Provide second-level support of SAP-systems to investigate, monitor, and resolve incident and/or change management requests
- Handle changes or emergency transports as needed for high-priority issues
- Support, define and create authorization concepts and roles in SAP
- Provide guidance to and shares knowledge with team relating to area of specialization
- Support of local departments and key users during project implementations and release-upgrades
- Produce functional documentation and technical specification
- Participate in global/regional/project team calls, workshops, trainings, and ad-hoc alignment meetings
- Manage own workload to meet assigned deadlines
- Actively participate in company initiatives

Your profile

The hired individual will be responsible for the successful delivery of SAP Plant Maintenance and/or Production Planning (PP) solutions, change management & technology initiatives.

- University degree in IT, Computer Science, Business, or related field
- Minimum 2+ full lifecycle SAP ERP implementation for module PP or PM and service management or other logistical module
- With several years of proven ABAP skills in developing Webdynpro ABAP and ABAP Object Oriented Programming
- With manufacturing experience and business process knowledge
