

Non-SAP Cloud Integrator - IT (TM)

Your tasks

Your vision is ambitious. Just like ours.

As an SAP Basis IT department, we are proud on delivering innovative IT solutions. Our global organization and projects are diverse, exciting and full of opportunities to make a real difference. However, what really sets us apart is our exceptional team spirit. We are driven by a shared passion for excellence, striving for shared success based on trust, mutual support and the freedom to take initiative. Together we celebrate our successes and exceed expectations to create impactful solutions.

As a non-SAP cloud integrator, you are a competent contact person in the SAP basis team for the SAP module teams and the SAP hosting partner for the integration of non-SAP cloud applications with the SAP ECC systems.

- You are responsible for the technical definition and technical design of the interfaces together with the SAP module teams, the providers of the non-SAP applications, as well as for their implementation together with the SAP hosting partner.
- Furthermore, you are responsible for provider management and the recording, planning and implementation of change requests as part of the continuous optimization of business processes and cost-optimal operations
- You will focus on the technical architecture of the system landscape and provider management
- You support the operation of the systems, including the implementation of support packages and the upgrade of the landscape to the desired release status
- In addition, you will execute an advisory role for the SAP application support staff in IT regarding technical issues as well as support in 2nd and 3rd level support.
- You support the globally organized 24 x 7 SAP operation and take part in the SAP Basis on-call service.

Your profile

- Completed degree in the field of computer science, business informatics or other engineering courses or strong professional experience in the IT environment
- Proven experience in a project or consulting environment
- In-depth knowledge of the SAP Basis module including knowledge of the SAP BTP platform as well as Fiori, S/4 HANA, SAC and similar applications in the SAP Eco-System
