

Consultant Purchasing/Full Stack Developer - IT (TM)

Ihre Aufgaben

Your vision is ambitious. Just like ours.

As an SAP Purchasing IT department, we pride ourselves on delivering innovative IT solutions that support every phase of the purchasing process. Our global organization and projects are diverse, exciting and full of opportunities to make a real difference. However, what really sets us apart is our exceptional team spirit. We are driven by a shared passion for excellence, striving for shared success based on trust, mutual support and the freedom to take initiative. Together we celebrate our successes and exceed expectations to create impactful solutions. Do you want to accelerate with us? Get started and **apply now!**

This position would be filled in a global team within Automotive IT - Business Applications with the main responsibility of Purchasing and Procurement.

Main tasks of the team are:

- Design and implementation of own developed solutions incl. execution and tests to ensure a high-quality standard being compliant with existing standards and regulations (e.g. GDPR, Cyber Security, ...)
- Analysis and consultation in case of requirements from our internal customers (Purchasing and Supply Chain Management organization), in the context of national/international projects based on self-developed solutions within the SAP BTP (Business Technology Platform) with the overarching target to create an integrated platform/solution landscape for our internal customers
- Participation in international IT projects
- Maintenance, enhancement and service operation of already existing application during the complete solution lifetime based on the Incident- and Change Management process
- Creation of technical documentation
- Investigation of new innovative IT technologies (like AI and Cloud) and creation of rapid prototypes
- Integration of business applications with other backend applications (SAP and Non-SAP)
- Close collaboration within a global team as well as with colleagues of other IT areas and our internal customers in an international environment

The mentioned tasks are required to be performed in the design, creation and operation (DevOps) of SAP Fiori Applications on the SAP BTP, HANA Cloud DB and several SAP Systems covering processes of basically all global locations of Continental Automotive.
