

IAM Solution Manager

Your tasks

As an Identity Management Solution Manager (m/f/diverse) you are part of a motivated, collaborative and skilled global team of IAM experts. In this role you will be responsible to design, implement, and manage our identity and access management (IAM) architecture. The ideal candidate will have a deep understanding of IAM technologies and best practices and will be actively involved in delivery, high level design, creating and reviewing prototypes for a secure and efficient IAM tool.

Key Responsibilities

- Design, develop, and manage the IAM architecture, including authentication and authorization frameworks.
- Implement and maintain IAM technologies and standards, ensuring compliance with policies and regulatory requirements.
- Collaborate with stakeholders to understand IAM requirements and translate them into technical specifications.
- Provide technical leadership for the integration of IAM systems with various applications and services.
- Develop and maintain documentation for IAM processes, procedures, and associated systems.
- Stay updated with the latest IAM technologies and best practices to drive continuous improvement.
- Participate in IAM enterprise governance processes and drive IAM standards adoption.
- Provide support and guidance to other team members regarding IAM.

Your profile

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- 3+ of experience in identity and access management, with a focus on architecture and design.
- Strong understanding of IAM concepts, including authentication, authorization, and directory services.
- Technical experience with IAM tools and technologies.
- Able to review designs thoroughly to make sure they meet the needs of the solution being built.
- Excellent problem-solving skills and the ability to work collaboratively with other teams.
- Good communication skills and capability to discuss technological concepts.
- Ability to work in a fast-paced environment and manage multiple priorities.
- IT Service management (Incident-, Change-, Problem- and Release-Management / ITIL) experience desirable.
- Novell eDirectory, NetIQ Identity Manager, SUSE Linux and Windows
