[Internship] - Web Backend Node.js Developer

工作职责

Each one of us can contribute to a better future. Leave your mark by joining our team and let's contribute together.

You should be a passionate **Web Backend Developer Intern** with a drive to create exceptional user experiences using Node.js (or similar backend technology, e.g. JAVA), Typescript and familiar with NoSQL database (e.g. Mongo DB). You will be supervised and guided by a senior, working together on a new Desk Booking Web application. You will be responsible for development, debugging and testing on back-end services.

Do you want to be an Internship for Continental applications? These should spark your interest:

Backend API Development

- Develop and maintain backend services
- Assist in the development of new feature and functionality for backend services
- Design and create NoSQL database models/schemas
- Test and debug code to ensure the service is fully functional
- Troubleshoot and resolve technical issues as they arise
- Act as quality assurance to ensure web application is functional as intended
- Work on any web related R&D / POC assignments from your supervisor
