Frontend Developer

Vos activités

Continental's eCommerce, Fleet Solutions, and Data Science Information Technology Competence Center creates a wide range of digital solutions for Continental's customers and internal stakeholders – and we want you to join us!

You will support the continued development of Continental Tire's Fleet Platform for the Americas and be responsible for the creation and testing of Angular web functionalities and components along with collaboration with Mobile teams to align UI/UX designs.

You will collaborate with SCRUM team of Angular and Java backend developers along with DevOps team for continuous delivery.

If you'd love to join an international crowd that works on the latest technologies and creates state-of-the-art solutions, Continental is the perfect match for you.

Main Responsibilities:

- Implement and support highly interactive web pages that have extensive use of Angular framework;
- Development of web components based on business requirements;
- Help facilitate a highly productive and collaborative work environment:
  - Collaboration with back-end team members for development of restful APIs.
  - Collaboration with global team members in US and external partners in Asia.
- Have responsibility for development of test code / test scenarios ensuring high quality;
- Provide production support;
- Support debugging and resolution of technical issue;
- Compile technical documentation and user assistance material which requires excellent written communication;
- Ensure continuous professional self-development;
- Follow Scrum/Agile methodologies to organize and plan projects;
- Embrace Continental's core values: Trust, freedom to act, passion to win and for one another.

Votre profil

- University Degree in Computer Science, IT or related field;
- 2 years of experience with Angular (minimum);
- Exposure to continuous integration tools such as Git, Jenkins, SonarQube;
- Exposure to JavaScript frameworks such as React, NodeJS and Karma
