

Cloud Platform Architect (Azure) (m/f/d) - REF78448I

Your tasks

The position may also be filled in Bengaluru, India.

Continental's digital capabilities are growing every day. Our global Cloud Services team is at the forefront of this transformation, establishing scalable, secure, and efficient cloud platforms that power our innovative solutions worldwide. We are seeking an experienced Cloud Platform Architect to lead the design, implementation, and governance of our enterprise Azure landing zone.

This is your opportunity to shape cloud architecture standards, create secure and compliant infrastructure, and build the foundation that empowers our development teams to deliver solutions efficiently and reliably.

Join us to architect the future of Continental's digital landscape in an exciting, collaborative global environment. In this role, you will be responsible for the following tasks:

- Designing and leading the architectural vision for Continental's Azure cloud landing zone, establishing enterprise-wide guardrails, principles, and patterns that align with Microsoft's recommended practices and Azure roadmap
- Driving strategic cloud platform enhancements in security, compliance, connectivity, and governance while providing technical oversight of the entire Azure landing zone infrastructure
- Architecting and enforcing cloud security controls across the enterprise, including automated compliance monitoring, vulnerability remediation processes, and integration with existing identity management systems
- Overseeing the development and implementation of Infrastructure as Code (IaC) solutions for automated provisioning, configuration, and management of Azure cloud landing zone
- Collaborating with internal stakeholders to provide secure, compliant access to Azure IaaS and PaaS offerings
- Troubleshooting platform issues and improving service documentation

Your profile

- Academic degree in computer science, another technical field or an equivalent qualification
- Several years of experience architecting cloud platforms (primarily Azure) and cloud infrastructure in enterprise environments
- Thorough experience in DevOps methodologies, including CI/CD implementation, version control systems, and automation tools within cloud environments
- General knowledge of at least one of high-level scripting language (e.g. Python, TypeScript) and Infrastructure as Code tooling (e.g.

About us

Continental develops pioneering technologies and services for

sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2022, Continental generated sales of €39.4 billion and currently employs around 200,000 people in 57 countries and markets.

With its premium portfolio in the car, truck, bus, two-wheel and specialty tire segment, the Tires group sector stands for innovative solutions in tire technology. Intelligent products and services related to tires and the promotion of sustainability complete the product portfolio. For specialist dealers and fleet management, Tires offers digital tire monitoring and tire management systems, in addition to other services, with the aim of keeping fleets mobile and increasing their efficiency. With its tires, Continental makes a significant contribution to safe, efficient and environmentally friendly mobility.
