

# System Protection Engineer

## Vos activités

As a System Protection Engineer (m/f/diverse) you are member of a motivated, collaborative, and skilled team of System Protection Specialists in a global environment which maintains and operates our System Protection tools. The ideal candidate will have a strong experience in cybersecurity and systems protection, ensuring the security and resilience of our systems against various threats.

## Key Responsibilities

- Provide third-level support for systems protection solutions, including firewalls, intrusion detection/prevention systems (IDS/IPS) and endpoint protection.
- Troubleshoot and resolve complex security-related issues and incidents, if required together with external consulting company / vendor.
- Conduct risk assessments and vulnerability analyses to identify potential security risks and develop mitigation solutions.
- Support with implementation of security policies, standards, and procedures to ensure compliance with industry regulations and best practices.
- Perform regular security audits and health checks to ensure the effectiveness of security measures.
- Participate in IT and business projects related to System Protection tools implementation in Continental.
- Provide training and guidance to first and second-level support teams on security best practices and solutions.
- Develop and maintain documentation for security configurations, processes, and procedures.
- Stay updated with the latest cybersecurity trends, threats, and technologies to drive continuous improvement.
