

Cloud Platform Engineer (AWS)

Your tasks

Continental's digital capabilities are growing every day. Our global Cloud Services team is at the forefront of this transformation, establishing scalable, secure, and efficient cloud platforms that power our innovative solutions worldwide. We are seeking an experienced Cloud Platform Engineer to design, implement, and maintain our enterprise AWS landing zone.

This is your opportunity to build robust cloud infrastructure, create secure and compliant environments, and support the operational foundation that empowers our development teams to deliver solutions efficiently and reliably.

- Join us to engineer the future of Continental's digital landscape in an exciting, collaborative global environment. In this role, you will be responsible for the following tasks:
- Developing and maintaining the landing zones' core infrastructure using Infrastructure as Code
- Implementing comprehensive security guardrails, compliance controls, and identity management solutions to protect cloud resources
- Automating account provisioning, network configurations, and self-service capabilities for internal teams
- Designing scalable cloud architecture patterns and connectivity solutions aligned with enterprise operational goals
- Troubleshooting and resolving customer-reported platform issues, service requests, and work orders
- Conducting root cause analysis for platform incidents and implementing preventative measures
- Creating and maintaining technical documentation and operational runbooks

Your profile

- Academic degree in computer science, another technical field or an equivalent qualification
- Several years of experience in cloud platform engineering with focus on AWS services and landing zone development
- Thorough experience with Infrastructure as Code (e.g. Terraform, CDK) and automation of cloud resources
- Strong experiences with major AWS core services (EC2, S3, RDS, VPC, IAM)
- Experience with operational aspects of cloud platforms including monitoring, incident response, and troubleshooting
- Proficiency in scripting languages (e.g. Python, TypeScript), version control systems, and working on the command line
- Basic understanding of IT service management processes and practices

About us

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2022, Continental generated sales of €39.4 billion and currently employs around 200,000 people in 57 countries and markets.

With its premium portfolio in the car, truck, bus, two-wheel and specialty tire segment, the Tires group sector stands for innovative solutions in tire technology. Intelligent products and services related to tires and the promotion of sustainability complete the product portfolio. For specialist dealers and fleet management, Tires offers digital tire monitoring and tire management systems, in addition to other services, with the aim of keeping fleets mobile and increasing their efficiency. With its tires, Continental makes a significant contribution to safe, efficient and environmentally friendly mobility.
