

Product and Process Industrialization Engineer

Feladatok

In this role, you will implement process industrialization activities to meet budget and production targets (e.g. reduce scrap and waste, cycle times, First Pass Yields). Furthermore, the PPI Engineer initiates and implements action plans for continuous improvement of all product and process industrialization relevant processes for production.

HOW YOU WILL MAKE AN IMPACT

- Managing product specific ramp-up or change projects (e.g. team setup, interfacing to business / customer organization, project planning and control, etc.) for new raw materials or new or relocated production processes according to Business Area-specific standards.
- Updating product-specific production control plan (in close collaboration with Quality) and work instructions (pre-series, series) according to standards provided by R&D Global Product Industrialization and Business Area Manufacturing Process Engineering team.
- Preparing shelf-life/storage instructions.
- Planning and performing product-specific testing and start-up of production process and pre-series production (e.g. ensuring processability, equipment performance) and handover to production (series) according to standards and render decision about the plant level approval in alignment with the R&D PI and BA MPE teams.
- Updating product specific process FMEA according to local conditions and standards.
- Identifying and implementing product optimization potential (e.g. raw material replacement) in running articles in alignment with R&D PI according to standards.
- Proactively solving quality issues regarding customer complaints and reject rate (in close collaboration with Quality) according to BA specific standards.
- Identifying and implementing technical production processes optimization potential regarding quality, efficiency and capability (i.e. process parameters) according to standards.
- Local implementation of BA product and process industrialization standards.
- Providing feedback and input for further development of standards regarding product and process industrialization processes (e.g. definition of production parameters, production flow plans, production control plans and work instructions, etc.), product and process industrialization IT tools (e.g. FMEA software) to sector, BA or divisional functions.

Profilja

WHAT YOU BRING TO THE ROLE

- Bachelor's Degree in Mechanical or Manufacturing engineering,
