

Quality Technician 1st Shift

Ihre Aufgaben

HOW YOU WILL MAKE AN IMPACT

Quality representative for the manufacturing process. Requires ability to accept or reject product, contain suspect product, support manufacturing goals for scrap and NOK rate reduction, adhere to established quality requirements & standards, and protecting internal & external customers from non-conforming product for Morganton Plant Production Processes.

Perform timely testing and analysis on Production parts (NOK's, process variation, etc) to determine root cause and provide information / data for corrective actions. Monitor Production line data (SPC) to focus and prioritize part analysis and investigations to protect the customer and lower scrap rates

Daily Duties

- 1) Perform testing and analysis on Production parts (NOK's, process variation, etc...)
- 2) Utilize data monitoring tools to highlight analysis priorities.
- 3) Support (Production, QAP, IT, etc...) in establishing optimized and updated Production data monitoring methods and alert triggers.
- 4) Develop and maintain current knowledge / information (as necessary) on product and station drawings, specifications, etc...
- 5) Document findings into individual reports and/or trend information.
- 6) Work with Sr. Quality Engineer (Jidoka), QAP and FA Operators to establish optimized Production line analysis strategy and support accordingly (Jidoka meetings, training...).
- 7) Support Plant and Worldwide meetings as needed (Fast response, Jidoka, Internal Defect Management, Scrap Reduction, etc...)
- 8) Plan and carry out special studies as needed to lower NOK & reject rates or gather data for changes to the process or product.
- 9) Maintain testing and analysis equipment, perform calibration activities.
