

Data Visualization (Tableau) Engineer/Developer

Your tasks

HOW YOU WILL MAKE AN IMPACT

SG 11

A Senior Data Visualization Engineer plays a pivotal role in analyzing data and generating business intelligence (BI) to support decision-making processes. This role focuses on data analytics and business intelligence, and is responsible for architecting, designing, developing, and maintaining interactive and insightful data visualizations using *Tableau*. The ideal candidate is not only detail-oriented but also possesses strong analytical skills and is passionate about transforming data into actionable insights.

- Collaborate with business stakeholders to understand their data visualization needs and business requirements and translate them into effective dashboards and reports.
- Architect, design, develop, and maintain visually appealing, interactive dashboards that ensure they provide meaningful and actionable insights.
- Manage workbook publishing and data refresh schedules to ensure data is updated and relevant for stakeholders.
- Optimize Tableau dashboards for optimal performance, including improvements in load times and responsiveness, as well as effective handling of large datasets.
- Develop, monitor, and maintain ETL processes for automated, scheduled data refreshes, collaborating with team members to resolve issues related to source system extracts, mapping, and data loading in a timely and efficient manner.
- Cleanse and prepare data for analysis and reporting to ensure data accuracy and integrity, and relevance.
- Conduct training sessions and support end-users in the use and interpretation of data visualizations.
- Provide ongoing support to resolve user issues and questions, as well as technical support and troubleshoot server-related issues.
- Work on special projects as requested by management.

Your profile

WHAT YOU BRING TO THE ROLE

- Bachelor's degree in a relevant field such as Data Science, Computer Science, Statistics, Mathematics, Business Analytics, or a related field
- 5+ years of experience in the business intelligence field, utilizing Tableau Desktop, Tableau Server, and Tableau Prep
- Extensive experience as a Tableau developer
- Extensive experience with MS SQL Server and relational database
