

Senior Software Engineer - Fullstack

Descrição da função

For our Location Porto, we search for dynamic and motivated people to join our growing IT and Data Solutions Segment.

Our focus is to provide the best solutions to our customers and for that we work in a collaborative approach between all our competence areas (e.g., Software Development, Cloud & Devops, Project management, Artificial Intelligence and Data Services) to create solutions with greater value.

Overview:

As a senior full stack developer, you will work alongside a team to develop and maintenance software solutions that can be internal tools or software solutions for our clients.

Core Responsibilities:

- Develop, enhance, and maintain our software solutions using C#, .NET Core, and Python for backend development, and Angular/React for frontend development.
- Design and implement RESTful APIs and microservices architectures to ensure scalability and maintainability of our applications.
- Test and debug the developed software, implementing both unit and integration tests to ensure code quality and reliability.
- Coach & guide junior members, providing mentorship and technical leadership to foster their professional growth.
- Optimize application performance and improve system efficiency through refactoring and implementing best practices.
- Collaborate with product managers and stakeholders to translate business requirements into technical specifications.
- Participate in the full software development lifecycle, from requirements gathering to deployment and maintenance.
- Troubleshoot and resolve complex technical issues in production environments.
- Document code, architectures, and technical processes for future reference and knowledge sharing.

Requisitos

Qualifications:

- Bachelor's Degree in Informatics Engineering, Computer Science or similar.
- Solid knowledge of C# and .Net Core, python
- Solid knowledge of Front-end framework (e.g., Angular/React)
- Solid knowledge of API Development
- Solid knowledge of Software Architecture like Micro-Services
- Fluent in English
