

RF Engineer

Jūsų užduotys

- Design of RF circuitry (ADS);
- Simulation and measurement of antenna elements (CST Microwave Studio);
- Measurement of antennas and electronic circuits (VNA);
- PCB layout design (Altium);
- Prototype assembly / PCB soldering;

Reikalavimai

- Bachelor's degree in Electrical Engineering, Telecommunication or related field;
- 2 years of professional experience in this area;
- Excellent English language skills, written and spoken;
- German language skills are a plus;
- SAP knowledge is a plus;
- Taste for research, organization activities, attention to detail and analysis skills;
- Passion for teamwork and collaboration in an international environment.

Ready to drive with Continental? Take the first step and fill in the online application.

Apie mus

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2024, Continental generated sales of €39.7 billion and currently employs around 190,000 people in 55 countries and markets.

The Automotive group sector comprises technologies for passive safety, brake, chassis, motion and motion control systems. Innovative solutions for assisted and automated driving, display and operating technologies, as well as audio and camera solutions for the vehicle interior, are also part of the portfolio, as is intelligent information and communication technology for the mobility services of fleet operators and commercial vehicle manufacturers. Comprehensive activities relating to connectivity technologies, vehicle electronics and high-performance computers round off the range of products and services.
