

SAP Sales Distribution (SD) - Central Key User APAC

Tus actividades

SAP is the core ERP system powering all commercial processes across the Continental Tire Division. At the heart of it lies the Sales & Distribution (SD) module, which supports all customer-facing sales functions. With over 13,000 users across 55 global sales locations and plants, SD is the backbone of our worldwide sales operations.

The Global Sales Solutions team oversees SD, Electronic Data Interchange (EDI), and the Project Management Office (PMO)—with SD being the largest and most dynamic area. As we prepare for the shift to SAP S/4HANA, the team is driving digital transformation, process excellence, and innovation across our sales landscape.

As a Central Key User SAP SD (Business Consultant), you act as a strategic link between business and IT, translating operational needs into system solutions. You'll collaborate with stakeholders across regions and organizational units, and support teams on-site through international travel opportunities.

Join a diverse, motivated, and globally connected team where team spirit, innovation, and individuality are key to shaping the digital future of Continental Tires.

What You'll Do:

- Contribute to the upcoming S/4HANA integration project, focusing on process optimization, change management, specification, implementation, training, and rollout.
- Drive and lead the automation initiatives using KNIME and Robotic Process Automation (RPA) to streamline repetitive tasks and improve operational efficiency.
- Empower local key users by providing expert guidance to enhance and streamline their sales processes.
- Translate business needs into system solutions by specifying, evaluating, and approving change requests.
- Ensure system reliability by testing and validating enhancements in the productive SAP SD environment.
- Resolve issues efficiently by managing service requests and error tickets via the BMC Helix ticketing system.
- Drive user adoption through engaging training sessions and documentation in formats such as OneNote, PowerPoint, and video.
- Foster collaboration by organizing and participating in international key user meetings.
- Align business needs across the tire division within a unified ERP framework.
- Collaborate cross-functionally with central key users from Finance, Controlling, Purchasing, and other SAP modules.
