Solution Architect Active Directory - Digital Workplace Infrastructure OESL

Responsabilități

We are seeking an experienced IT Solution Architect for Active Directory to join our Digital Workplace Infrastructure team at OESL. In this role, you will be responsible for ensuring secure, scalable, and efficient Active Directory (AD) services across our global IT landscape. The ideal candidate brings deep expertise in AD technologies, architecture design, and security best practices, and will play a key role in shaping and maintaining a stable and future-ready directory environment.

Your key responsibilities will include:

- Design and lead the implementation of Active Directory architecture, including domain structure and site topology, with a strong focus on security, scalability, and least privilege principles.
- Evaluate, design, and drive the adoption of new technologies and enhancements related to Active Directory and directory services across OESL.
- Collaborate closely with the Cybersecurity department to define, implement, and maintain AD security concepts and ensure compliance with corporate standards and policies.
- Provide consulting services for Active Directory, Azure AD, and Federation Services to internal teams and stakeholders.
- Perform regular audits and health checks to ensure the stability, performance, and security of the AD environment.
- Lead the integration of AD services with enterprise ap plications and systems, ensuring seamless interoperability and performance.
- Troubleshoot and resolve complex AD-related issues in cooperation with internal teams, external partners, and vendors.
- Develop, maintain, and improve comprehensive documentation for AD infrastructure, processes, and procedures.

Cerințe

- Bachelor's degree in computer science, Information Technology or an equivalent qualification.
- Proven experience in architecting and managing complex Active Directory environments.
- In-depth knowledge of AD DS, Azure AD, AD FS, Group Policy, and related technologies.
- Experience with Entra ID and Red Forest.
- Strong understanding of identity and access management principles and security best practices.
- Experience in working within large-scale, enterprise-level IT environments.
- Creative problem-solving skills and analytical thinking
- Strong communication skills, with the ability to collaborate across functional teams.
