

Application Engineer Precision Sealing Solutions OESL (m/f/d) - REF80903Y

工作职责

We are looking for you, an Application Engineer (m/f/diverse), to support the Precision Sealing Solutions (PSS) in our Business Area Original Equipment Solutions (OESL) at the location Northeim.

Your tasks will focus on the following activities:

- Execution and monitoring of project-specific development activities within product application engineering
- Development of products according to customer specifications
- Execution of the technical, project-specific customer service
- Acquisition of new projects in cooperation with the sales department
- Completion of all deliverables for Application Engineering specified within the project management system (Quality Gate System)
- Documentation of all project activities of Application Engineering in the project management system PLANISWARE
- Elaborating/evaluating feasibility checks for RFQ utilizing multidisciplinary teams
- Support for new and change management projects in the PLC from Gate 10-90
- Analysing and improving existing products
- Support of sales and project management in customer service

职位要求

- Academic degree in Engineering or equivalent
- Several years experience in the automotive industry, including customer interaction
- Experience in direct customer contact
- Knowledge about OESL related products in design, production, testing
- Experience in research and development as product development engineer, design engineer or project manager
- Ability to work independently and self-motivated
- Experiences in international and intercultural environment
- Very good English language skills (written and spoken)
- Very good German language skills (written and spoken)
- Strong team player and good communicator at various levels
- Willingness to travel

Applications from severely handicapped people are welcome.

关于我们

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2024, Continental generated sales of €39.7 billion and currently employs around 190,000 people in 55 countries and markets.

Guided by the vision of being the customer's first choice for material-driven solutions, the ContiTech group sector focuses on development competence and material expertise for products and systems made of rubber, plastics, metal, and fabrics. These can also be equipped with electronic components in order to optimize them functionally for individual services. ContiTech's industrial growth areas are primarily in the areas of energy, agriculture, construction, and surfaces. In addition, ContiTech serves the automotive and transportation industries as well as rail transport.
