

Regional Security Manager for Original Equipment Solutions (m/f/d) - REF81102G

Descrição da função

In your role as **Regional Security Manager (m/f/diverse)**, you will work in a dynamic environment and modernize and optimize the OESL Cybersecurity framework, system landscape and service provider portfolio with us. The role handles the relationship between the central Cybersecurity Departments and locations/tech centers towards our business customers as well as to our internal and external suppliers for all Cybersecurity related topics. You will be an integral part of the global team Regional Security Management within the Cybersecurity department.

Your responsibilities:

- Responsible for managing the relationship between our global OESL's Cybersecurity department and the local IT management teams & manufacturing engineering teams
- Ensuring seamless communication between these areas
- Being local contact partner (m/f/d) to support regular operations support for all CS related topics for local IT/OT organization in own area of responsibility
- Provisioning training on current available central Cybersecurity rules for local IT/OT areas
- Planning of local security assessments, aligning with team lead of Regional Security Management as well as local teams
- Conducting local security assessments in IT/OT areas based on current Cybersecurity rules as well as central/local instructions and manuals
- Identifying results pursuant to security assessments
- Analyzing these results, reviewing with local teams and defining corrective actions
- Tracking of realization of these corrective actions
- Aligning to controls as defined in Cybersecurity rules for application, if needed defining adjustments and reporting back to central team CS Management Systems
- Contributing for defining local reporting requirements and advising feedback to central CS reporting group
- Review central reporting with focus on local IT/OT organization in own area of responsibility and analyzing together with local teams

Requisitos

- Bachelor's degree in computer science, IT, or related field
- Several years of experience in IT infrastructure (client, server, virtualization, storage, Backup & Recovery, OS, data center and cloud environment), and/or cybersecurity
- Proven expertise in these working areas and related work processes
- Familiarity with project management methodologies (Agile, Waterfall)
