- Experience in more than one engineering discipline preferred
- Language: Japanese/Native, English/Fluent
- Minimum 5~8 years experience in automotive , and certain experience regarding HuD

我们可以提供

Recent situation, since system level integration and combination solution with other products as integrated system has been introduced, importance of experienced Project Manager is more increased and right project handling is necessary in time with right communication to understand/proceed correctly. In addition, deep technical discussions (e.G. FSM, new function in combination with other units) are much increased and discussion required by customer year by year in Japan.

关于我们

Safety and Motion division develops, produces and markets intelligent system to improve driving safety and vehicle dynamics. Integral active and passive safety technologies and products that support vehicle dynamics provide greater safety, comfort and convenience. The goal here is to implement “Vision Zero”, the vision of accident-free driving.
