

New product launch manager acquisition

Your tasks

- Lead manufacturing related activities of complex industrialization projects within the Product Life Cycle, from acquisition until series production.
- Develop the Manufacturing Concept based on product architecture and requirements matching them to state-of-the-art production processes and technologies.
- Be responsible for completing activities within operations to meet the specific, cost, timing, and quality requirements.
- Be responsible for documentation of operations activities.
- Actively manage and optimize the use of resources in the project, and assign activities to the operations project team members.
- Coordinate and control project activities, track the project progress, and define corrective measures.
- Ensure spending and investments are aligned with approved authorizations and/or budgets.
- Ensure technical, timing, and cost feasibility to manufacturing processes to eventual changes in product or requirements and lead change management activities in production related to product or process.
- Promote continuous improvements for products, processes, and projects in your area of responsibility.
- Provide support in quality tasks to analyze, contain, and resolve issues during launch and serial production.
- Coordinate and manage prototype sample production activities.

Your profile

- University degree in a related field (engineering/sciences).
- 3 years of similar experience in the automotive or consumer electronics industry.
- General knowledge about common manufacturing technologies for electronic manufacturing.
- Communication and presentation skills.
- Project Management skills.
- Capable to interact with international teams.
- Problem-solving skills.
- Leadership.
- Experience in multicultural environment/international projects.
- Good knowledge of English both written and spoken.
