

(Senior) Machine Learning Engineer

Your tasks

Continental's digital capabilities are growing every day. Our eCommerce, Fleet Solutions and Data Science Information Technology team creates a wide range of technology solutions for Continental's Global Sales and Marketing teams – and we want you to join us!

Our Applied Analytics and AI team continuously works on the digitalization of our business-to-business processes and end consumer communication, using modern tech stacks with a strong focus on data science and artificial intelligence. Whether you want to optimize big production machines for an impact on sustainability or work with an international sales organization -we run a diverse range of operational data-driven products across the entire value chain of a tire.

If you'd love to join a global team that works on the latest technologies and creates value-added solutions for customers, Continental is the perfect match for you.

As Senior ML Engineer your main responsibilities will be:

- Architect and design machine learning systems that provide value in close collaboration with business stakeholders from various domains;
- Provide technical oversight and guidance in their implementation to a team of data scientists;
- Take responsibility for maintaining these systems in production;
- Take co-ownership in shaping the processes, standards and conventions of our organization to increase maintainability of solutions (e.g., via technical blueprints).

Your profile

- University degree in Computer Science, Data Science, or related studies;
- Proven track record of delivering business value with data products powered by machine learning;
- Hands-on mentality with very good knowledge in Python;
- Solid background in software-engineering best practices (e.g., design patterns, databases, code review, versioning, etc.);
- Knowledge on deployment in Cloud environments (e.g., AWS or Azure);
- Excellent communication skills;
- Very good self-organization and autonomous working style;
- Critical thinking, problem-solving mindset and the ability to quickly deep dive into new problems;
- Experience with Agile project management;
