

Material Process Developer

Tus actividades

- Execute ContiTech Technology R&D & Operations Strategy for material process development, focusing on mixing processes
- Maintain and improve state-of-the-art process portfolio, including process specifications and capability analysis
- Lead continuous improvement of business processes and R&D systems in material process development
- Steer projects to enhance data usage and AI applications in material processing
- Coordinate interdisciplinary, multi-site teams and manage internal customer relationships
- Execute cost-saving activities with material development based on process improvements
- Support development of process simulation and explore new technologies for CT in material processing
- Collaborate with research organizations, universities, and startups to drive innovation
- Ensure customer satisfaction and productivity increases in CT plants through effective material process development

Tu perfil

- Master's Degree or PhD in Engineering, Material Science, or related field with minimum 5 years of experience in engineering, process development, or operational plant roles, focusing on compounding technologies and rubber process technology.
- Demonstrated leadership and project management experience, including ability lead cross-functional teams.
- Strong understanding of material processing, R&D, and manufacturing operations, with experience in process capability analysis and continuous improvement methodologies.
- first experiences of AI applications and data-driven decision making in material processing,
- Excellent communication and collaboration skills, with experience in cultural sensitivity.
- Strong problem-solving skills with ability to think critically and innovatively, particularly in cost-saving initiatives and process optimization.
- Willingness to travel required.

Lo que ofrecemos

We want our employees to do well with us. That's why we offer them not only an exciting job in an international technology group, but also numerous additional offers such as flexible and hybrid working, sabbaticals and other benefits. Click [here](#) to find out more.

Acerca de nosotros

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2022, Continental generated sales of €39.4 billion and currently employs around 200,000 people in 57 countries and markets.

The ContiTech group sector develops and manufactures, for example, cross-material, environmentally friendly and intelligent products and systems for the automotive industry, railway engineering, mining, agriculture and other key industries. Guided by the vision of “smart and sustainable solutions beyond rubber,” the group sector draws on its long-standing knowledge of the industry and materials to open up new business opportunities by combining various materials with electronic components and individual services.
