

Development Engineer Rubber Products (m/f/diverse) - REF82099B

Your tasks

OESL – Original Equipment Solutions, for Future Mobility

Are you ready to grow together with a global, dedicated, and experienced team?

Become part of our team and shape the future of the evolving automotive industry in your new role as Development Engineer Rubber Products (m/f/d) in the independent business unit Original Equipment Solutions.

The goal of rubber product and process development is laying the foundation of innovation for the business area Original Equipment Solutions (OESL) to be the leader for highly developed, intelligent and sustainable rubber products for the automotive industry as the best solutions for each of our customers in each of our markets. We are looking for a Development Engineer Rubber (m/w/d) starting **01.09.2025**.

Your tasks will focus on the following activities:

- Leading projects for the development of new technologies and processes with special focus on rubber products to ensure selective technology leadership of OESL
- Managing the internal interface within defined R&D process to peer R&D departments to ensure internal and external process and quality requirements
- Reviewing product developments internal and external with respect to technical content and intellectual property
- Following market trends, exhibitions and fairs to technical development
- Driving conceptional ideas to patents and or unique selling points
- Ensuring a robust network within the responsible functional area across all technical departments within R&D and all segments
- Constant progression of our specifications in design and manufacturing to improve the product usage for our application engineers to internal and external customers
- Innovating and/or creating solutions to support our corporate sustainability strategy

Your profile

- Academic degree in mechanical or industrial engineering, automotive engineering, chemistry or materials science
- Experienced in automotive industry
- Several years of professional experience in the area of process engineering / process or product development in the field of rubber

Ready to drive with Continental? Take the first step and fill in the online application.

About us

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent, and affordable solutions for vehicles, machines, traffic and transportation. In 2023, Continental generated sales of €41.4 billion and currently employs around 200,000 people in 56 countries and markets.

Guided by the vision of being the customer's first choice for material-driven solutions, the ContiTech group sector focuses on development competence and material expertise for products and systems made of rubber, plastics, metal and fabrics. These can also be equipped with electronic components in order to optimize them functionally for individual services. ContiTech's industrial growth areas are primarily in the areas of energy, agriculture, construction and surfaces. In addition,

ContiTech serves the automotive and transportation industries as well as rail transport.
