

CNC Programmer

Vos activités

Your tasks

HOW YOU WILL MAKE AN IMPACT

The CNC Programmer creates machining instructions. This work often includes reviewing three-dimensional computer-aided/automated design (CAD) blueprints, determining where to cut, and other calculations. The Programmer then translates the instructions into a computer aided/automated manufacturing (CAM) program. The Programmer and/or the Operator of the machine check the program through first piece run off and first piece inspection approval. Other responsibilities:

- Creates setup sheets with tooling and work-holding details
- Creates programs to control the operation sequence and cycling of CNC turning and milling centers
- Utilizes drawings or CAD models to support program development
- Utilizes CAM software to produce programs
- Supports process optimization and machine utilization with updates as necessary
- Provides input on process decisions and strategies
- Experience performing full set-ups, program edits, and holding tolerances as tight as +/- .0001"
- Complete understanding of machine control management, including mastering of all machine code terminology, usage, along with macro programming usage
- Awareness of cutting tool technology, to support application optimization
- Complete understanding and awareness of measurement tool usage
- Complete understanding of work-holding strategies and usage
- Ability to communicate application status both to department team to shop level associates, in terms of application status, issues, and requirements
- Trouble-shooting skills and ability to think critically
- Ability to read prints and update paperwork neatly, accurately, and in an organized manner
- Works within company policy as outlined in the Continental Handbook
- Performs other duties as assigned by the manager as needed

THE ENVIRONMENT

- Safety is our highest priority and safety procedures / guidelines must be always adhered to. This includes wearing safety-toed shoes and safety glasses.
- This role is within a climate-controlled facility.
- The role involves various physical tasks, including lifting and operating machinery, with comprehensive training provided.
