

Data Analyst & Visualist for Iasi location

Your tasks

For the newly established Data Analytics & Reporting department in Automotive Finance & Controlling, we are seeking an experienced and dynamic Data Analyst & Visualist.

This role involves analyzing data to support business decisions and creating & designing compelling visualizations that transform complex data into clear & actionable insights.

Main Tasks:

- Perform detailed exploratory data analysis to identify trends, patterns, and insights.
- Conduct ad hoc analyses to answer specific business questions and support decision-making.
- Utilize statistical techniques to interpret data and provide actionable recommendations.
- Work with large datasets to extract, clean, and prepare data for analysis
- Create interactive and visually appealing dashboards and reports using tools like Power BI, or similar.
- Develop and design data visualizations that effectively communicate insights and findings.
- Collaborate with stakeholders to understand their data needs and translate them into visual solutions.
- Ensure visualizations are user-friendly and accessible to non-technical stakeholders and follow the governance standards
- Generate regular and ad hoc reports to track key performance indicators (KPIs) and business metrics.
- Develop and maintain documentation for data analysis processes and methodologies
- Work closely with cross-functional teams, to ensure data solutions align with business objectives.
- Provide training and support to team members and stakeholders on using data visualizations and reports.

Your profile

- Bachelor's degree in Data Science, Statistics, Computer Science, Information Systems, Business Administration, or a related field.
- Minimum of 2-4 years of experience in data analysis and data visualization.
- Knowledge of Financial Reporting logic, tools (e.g. FiRe, SAP R/3 and BW) and guidelines
- Proven experience with data visualization tools such as Power BI and SAP Analytics Cloud (SAC) or similar.
- Strong analytical skills with experience in statistical analysis and data manipulation.
- Strong knowledge of data visualization principles and best practices.
