

Principal Consultant Data Science

Náplň práce

Your tasks

As a team member of the Group Sector Central Function Technology of ContiTech, you will be globally responsible to drive success of applied data science and effective usage in all areas of the organization. Design and implement innovative data-drive solutions to solve complex business problems, using cutting-edge techniques to build up customer centric platforms to reduce complexity, ensure standards, maximize cost savings as well as developing innovative material-driven solutions for a carbon-neutral and 100% circular product portfolio.

You

- Consult on effectively applying Data Science methodology, technology, and good practices, complementing AI/DS platform owners, AI/DS sector owners, AI/DS project owners.
- Create and execute a global Data Science/Data Architecture strategy based on the overall CT Technology strategy together with the CFO IT Data Science team.
- Portfolio Management - Define the Process of Portfolio and bring it into execution
- Ideation Facilitator: Explore with Business Areas to keep the Use case pipeline filled continuously
- Develop best practices, guidelines, and standards for data science in collaboration with AI/DS stakeholders to build solutions.
- Maintain a deep understanding of the business and industry to identify emerging trends and research to actively drive technology opportunities.
- Work closely with cross-functional teams to identify opportunities for improving business performance and delivering impactful results.
- Develop and implement models and algorithms using machine learning, deep learning, natural language processing, and statistical analysis.
- Lead the development and implementation of data pipelines and infrastructure to support data analysis and modeling.
