

Sustainability Manager APAC

Tus actividades

Purchasing in the region "APAC" is responsible for the strategic and operational sourcing of Production Materials (PM), Non-Production Materials (NPM) as well as components, parts and trading goods. "APAC" region comprises all countries Asia Pacific region in which Continental has own operations and/or suppliers.

One core strategic pillar of Purchasing is sustainability. In the field of sustainability we are looking for a highly motivated candidate for the region located in **Singapore**.

This position will be established for Continental Tires.

Your Tasks

- Monitor, analyze, and report on carbon emissions data across the APAC supplier network, supporting compliance with international and local sustainability regulations and in close alignment with relevant functions in Continental.
- Conduct risk assessments and impact analyses related to responsible value chains (RVC), including carbon footprint evaluations and sustainability performance benchmarking.
- Lead the implementation of sustainability initiatives in the APAC region (e.g., decarbonization, circular economy, due diligence) by collaborating with internal stakeholders and suppliers
- Manage sustainability audit findings in the APAC region and ensure ongoing compliance with relevant environmental and human rights standards (e.g., ISO14001, SA8000). Support sustainability audit conduction on demand.
- Manage and develop relationships with internal and external stakeholders and with team and project members
- Address and rectify non-compliance incidents in coordination with suppliers and internal teams, ensuring alignment with corporate sustainability goals.
- Develop and deliver training programs and workshops to build supplier capabilities in sustainability practices, including renewable materials, decarbonization and circularity.
- Support the development and execution of stakeholder engagement strategies, including change management and communication plans, to embed sustainability into purchasing processes.
- Track and evaluate the effectiveness of sustainability projects and supplier improvement plans, using data-driven insights to inform continuous improvement.
- Maintain up-to-date knowledge of carbon markets, sustainability regulations, and industry best practices to advise internal teams and contribute to strategic planning.
