IT Consultant for Storage, Compute and Virtualization (TM)

工作职责

As **IT Consultant for Storage, Compute and Virtualization** (m/f/diverse) you will be joining the core technologies data center team responsible for architecture, development, and level 3 support of our Core Infrastructure. You will have the opportunity to work on innovative projects and technologies in an agile environment, develop and implement own ideas, and work independently within the specified framework to have a direct impact on the success of our Automotive IT and the Automotive business. If you have experience in developing or working as a DevOps, you can have the opportunity to also support our transformation from classic infrastructure to Infrastructure as Code (IaC).

Basic responsibilities:

IT Datacenter development, operations and support:

- 3rd level support & consultancy for Core Infrastructure:
  - Storage (Netapp)
  - Virtualization (VMware)
  - Compute (Dell/Cisco)
  - Switches (Cisco)
  - Central management tools
  - Monitoring environment
- Participate in architecting the future Core Infrastructure by providing new ideas, improving the current service, transforming it into the future and ensuring that it will be able to serve all business demands faster and more flexibly.
- Coordinating and driving projects such as a global rollout and migration.
- Troubleshooting and debugging of IT infrastructure DC problems and incidents (level 3) in an international environment.
- Executing change and incident management by following standard ITSM rules.
- Supporting the follow-the-sun operations as well as problem and escalation management.
- Actively identifying and implementing security improvements.

职位要求

- Academic Degree in Computer Science, Business Informatics, Information Technology, or a comparable field.
- At least 5 years of technical experience in Information Technology;
  - Extensive experience in managing Netapp (ideally holding Netapp certification) is a must.
  - Hands-on experience in Compute (including hardware), Virtualization, Network, and, Cloud services.
  - Experience in scripting, pipeline- and software development tools (e.g. Git, Jenkins, Ansible, Powershell, Python, other programing
