

# Product Designer

## Feladatok

- **Key Responsibilities:**
- **Product Design:**
  - Create 3D models and 2D drawings of components, assemblies, and finished products.
  - Update models and drawings based on feedback from development and production processes.
  - Perform simple calculations and feasibility studies in CATIA.
  - Apply knowledge of GD&T (Geometric Dimensioning and Tolerancing).
- **Product Design Lifecycle:**
  - Archive design data using intranet, SAP, and PDM/PLM systems.
  - Execute data transfers to customers, suppliers, and tool manufacturers.
- **Product Design Support:**
  - Assist product development engineers in documenting project activities.
  - Provide technical and project-specific customer care.
  - Support development team during the launch phase of new tools or processes.
- **Continuous Improvement:**
  - Enhance existing modeling methods and standards to increase efficiency.
  - Continuously improve skills in new technology areas.
- **Internal Communication:**
  - Maintain close communication with suppliers and development team during RFQ and project phases to optimize design costs.
- **Simulation:**
  - Perform simulations to reduce design time and workload on the FEA team.

## Profilja

### Required Competencies:

- **Technical Knowledge:**

Advanced experience with CAD software (CATIA) and GD&T.

- Knowledge of production technologies and materials.
- Basic experience in FEM and CAE methods.
- Advanced level of written and spoken English.
- **Skills:**
  - Technical and analytical thinking.
  - Independent working ability and assertiveness.

### Required Experience:

Job ID  
**REF84779H**

Telephely  
**Suzhou**

Vezetői szint  
**Beosztott**

Munkahelyi rugalmasság  
**Helyszíni munka**

Jogi egység  
**OESL Automotive Changshu Co.,Ltd**

- Technical education (bachelor's degree).
- Minimum 2 years of experience in the automotive industry (especially Mount Production) and with CAD- and PLM-Systems
- Experience working in an international team is an asset.
