

Robotics Engineer

Ihre Aufgaben

POSITION DESCRIPTION:

An ideal candidate for this position will be someone who can work effectively on a small team to implement robust manufacturing solutions involving collaborative or industrial robotics. Proficiency with industrial and collaborative robots, mechanical design, and HMI/PLC development are integral to this role. Projects will vary from updates to existing equipment, to basic collaborative robot handling solutions all the way to fully integrated production equipment performing operations such as screw-driving, sealant dispense, and product assembly. We utilize the latest Allen-Bradley safety PLCs and industrial and collaborative robots, working closely with our component suppliers to ensure we can stay ahead of the innovation curve. There are also no shortage of new ideas and interesting challenges, so you'll have no trouble finding opportunities to make a difference fast!

DESIGN & DEVELOPMENT:

- Use process requirements and design guidelines
- Create and review equipment/production concepts; includes:
 - Safety risk assessment
 - Mechanical (end-of-arm tool, fixtures, frame, etc.)
 - Electrical/control (actuators, sensors, communication, HMI, PLC)
 - Software (PLC and HMI)
- Component evaluation and sourcing
- Document design (mechanical drawings, schematics, spare parts, etc.)
- Debug and qualification of new equipment

CONTINUOUS IMPROVEMENT:

- Escalation point for production support topics
- Mentor technical resources (engineers, technicians, etc.) to improve flexibility
- Identify and implement production improvements

INNOVATION:

- Evaluate new technologies to enhance capabilities, some examples:
 - New equipment
 - Robotics with integrated AI-enhanced vision
 - Advances to safeguarding
 - Applied big data to facilitate machine learning for equipment robustness, process control, and intelligent maintenance
- Document findings and share with global community

Engineering

Standort
New Braunfels

Leadership Level
Leading Self

Job Flexibilität
Onsite Job

Rechtliche Einheit
**Continental Autonomous
Mobility US, LLC**

- Bachelor's in Engineering (Mechanical, Electrical, Systems, or Controls) or other related field of study
- Strong time-management skills with the ability to manage multiple priorities
- 2+ years experience writing ladder logic in manufacturing using a safety PLC (Rockwell/AB)
- 2+ years experience with industrial robots/cobots (Fanuc, Universal Robotics, Techman)
- Knowledge of safety standards for machine design and risk assessment
- Machine building
- Mechanical design using CAD (Solidworks)
- Must be able to work well on a team
- Strong, clear, written and verbal communication skill
- Ability to work possible non traditional work hours as needed (on call some nights and weekends)
- Interest in working on the shopfloors and the lines, training and mentoring technicians.

Legal authorization to work in the U.S. is required. We will not sponsor individuals for employment visas, now or in the future, for this job opening

Relocation is not available for this opportunity.

PHYSICAL DEMANDS:

- Ability to lift up to 40 pounds unassisted. Must be able to stand for up to 10+ hours. Must be able to Push, Pull Reach, Twist, Turn, Stoop, Walk, Stand for up to 10+ hours

MUST BE ABLE TO PERFORM THE ESSENTIAL FUNCTIONS OF THIS POSITION WITH/WITHOUT REASONABLE ACCOMMODATION.

Unser Angebot

THE PERKS

- Immediate Benefits
- Robust Total Rewards Package
- Paid Time Off
- Tuition Assistance
- Employee Discounts, including tire discounts
- Competitive Bonus Programs
- Employees 401k Match
- Diverse & Inclusive Work Environment with 20+ Employee Resource

groups.

- Employee Assistance Program
- Future Growth Opportunities, including personal and professional
- And many more benefits that come with working for a global industry leader!

Über uns

THE COMPANY

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2023, Continental generated preliminary sales of €41.4 billion and currently employs around 200,000 people in 56 countries and markets.

The Automotive group sector comprises technologies for passive safety, brake, chassis, motion, and motion control systems. Innovative solutions for assisted and automated driving, display, and operating technologies, as well as audio and camera solutions for the vehicle interior, are also part of the portfolio, as is intelligent information and communication technology for the mobility services of fleet operators and commercial vehicle manufacturers. Comprehensive activities relating to connectivity technologies, vehicle electronics and high-performance computers round off the range of products and services. Are you ready to shape the future with us?
