b) Protect the Customer by assuring reliable PV Test results that proactively identify potential field failures that could result to warranty claims/recalls which may endanger the Company image:

- Ensures immediate actions and comprehensive analysis of defective parts from O-Km and Field.

- Communicate directly to Customer for the resolution of Customer Complaint.

- Manage customer portals and understand customer specific requirements.

- Failure Analysis of failed part/s from Customer Returns and PV Failures.

- Conduct an effective 8D generation to avoid reoccurrence of issues to customer and performs 8D Quality assessment of accomplished 8D's.

- Ensure on-time completion of 8D and reporting to customer.

c) Execution of Quality Testing for Product Validation:

- Manages the capabilities of PV to provide real-time plant wide support.

- Perform and report PV test results for change PPAP resulting from any change during series production after G90.

- Perform Equipment Maintenance and Compliance Verification (i.e. Proficiency Testing, Calibration and Preventive Maintenance).

- Perform PV equipment capacity planning.

- Development, modification, verification and validation of methods

- Analysis of results, including statements of conformity or opinions and interpretations

- Report, review and authorization of results- Maintain and expand the business partnership with customers, suppliers and other interested parties to meet and exceed their expectations.

- Understand customer requirements and deliver accordingly.

- Gain customer's trust through on-time response and transparent communication.

- Maintain positive customer feedback rating

- Perform Supplier Performance Monitoring (Outsourced tests).

- Expand the external laboratory mapping.- Develop and maintain a competent and knowledgeable Quality Laboratory and WRC team to fulfill and exceed their tasks to keep and continuously improve the its performance.

- Actualize Competency Assessment of team members towards the desired competency Level.

- Establishes technical training modules for Laboratory personnel.

- Develop and maintain the competency of respective subordinate thru the use of Competency Assessment and the generation of the Developmental Plan.

- Ensure competency of laboratory technicians through periodic training and qualification exams.- Engaging and directing the organization towards Quality First Mindset in a multicultural environment.

- Develop, maintain and implement effective test solutions to meet customer expectations.

- Participates and to be involved Quality programs like Quality Week, and Quality Awards.

- Perform Risk Assessment on Laboratory processes.Promote Core Values and Malasakit culture through active involvement in Company activities

- Initiate Malasakit activities

- Participate in Human Relations in their CSR and GWP activities

- Effectively implement procedures in accordance to the Environmental and Energy Management System (ISO 14001 and ISO 50001)-

Digitalization team for Laboratory.

- Lead and Participate in CBS Programs and CIM ideas.
- Contribute to the maintenance of the laboratory in terms of 5S.

A propos de nous

We make individual mobility safer, more comfortable and more sustainable. As a partner to the automotive industry, Continental develops and manufactures components, modules and systems. The safety and comfort of road users are at the center of our work. In addition, we develop ever more products which contribute to the protection of the environment by reducing fuel consumption.

Continental is one of the five largest automobile suppliers worldwide. Our development centers and production facilities are located where our customers are, so we are always nearby - worldwide. Many of our business units have excellent competitive positions: We are number one worldwide for foundation brakes, safety electronics, telematics, vehicle instrumentation, and fuel supply systems, and number two for electronic brake systems and brake boosters. We are the fourth worldwide for tires and are the European market leader for passenger and light truck tires, winter tires, and industrial tires. Our ContiTech division is the world market leader for foils used in vehicle interiors, conveyor belts, as well as for air springs used in rail transportation technology.

The Plant is certified on TS 16949, ISO 14001, ANSI ESD S.20-2007, IEC 61340-5-1:2007.
