

MES Expert

Your tasks

- Analysis and documentation of the production processes in the affected plants through the ERP system
- Recognizing the interrelationships of production processes in a plant
- Definition of a uniform process together with the plants as a basis for the specification management of projects/project management
- Elaboration of the specification together with all process participants. This includes internal departments such as production, quality and PI as well as external service providers
- Specification of the hardware required for implementation
- Implementation of the functions within the framework of a defined worldwide standard
- Testing of the ordered functions in the test system. After a successful test, the functions are released and transferred to the "Live Systems"
- Training of employees or trainers in MES
- Trouble shooting during the introductory phase
- Contact person in case of problems
- Documentation and implementation of identified improvements in the process as well as in SAP
- Reference to and interest in programming and the topic of digitalization in manufacturing

About us

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent, and affordable solutions for vehicles, machines, traffic and transportation. In 2023, Continental generated sales of €41.4 billion and currently employs around 200,000 people in 56 countries and markets.

Guided by the vision of being the customer's first choice for material-driven solutions, the ContiTech group sector focuses on development competence and material expertise for products and systems made of rubber, plastics, metal, and fabrics. These can also be equipped with electronic components in order to optimize them functionally for individual services. ContiTech's industrial growth areas are primarily in the areas of energy, agriculture, construction, and surfaces. In addition, ContiTech serves the automotive and transportation industries as well as rail transport.
