

DESIGN ENGINEER OR ANALYST

Ihre Aufgaben

- Functional design: Consolidation of the design features and design parameters as a result of function carrier design;
- Physical concept in the form of a assembly and component structure (physical architecture);
- Generate and ensure product maturity of the assembly and of the components;
- Engineering activities related to feasibility (process related design features, tolerance chains, qualities etc.);
- Rate the product maturity regarding feasibility (risk management);
- Provide design constraints to the function carrier design;
- Consolidation of insights and determination of process related design features, completion of assembly and component design taking into account the constraints of assembly and manufacturing processes.

Ihr Profil

- Engineering Graduation complete or ongoing
 - Design - Basic Knowledge
 - Design - Basic Capability
 - Design Release Handling
 - Design - FMEA Capability
- Process - Knowledge
- Product - Knowledge
- Production - Knowledge
- Problem Resolution Management Capabilites
- Engineer Basic Capabilites
- English advanced

Unser Angebot
