

L3 Network Engineer - Tires

Your tasks

As an L3 Network Engineer – Datacenter, you will be part of the global Network Services team, focusing on the design, consulting, and rollout of datacenter network solutions across our enterprise landscape.

You will act as a technical expert and trusted advisor, shaping the evolution of our datacenter network architecture and supporting global initiatives.

Your main responsibilities

- Design and evolve datacenter network architectures for central and location-specific environments
- Define and maintain standards for:
 - Core switching and routing
 - Network segmentation and firewalling
 - Integration with WAN, cloud, and LAN environments
- Drive standardization and simplification across the global network landscape
- Provide consulting and technical guidance to:
 - Global and regional network teams
 - Local IT at site level
 - Project and rollout teams
- Review and validate network designs to ensure alignment with global standards
- Support and lead datacenter rollout, migration, and transformation initiatives
- Ensure smooth integration into the global network environment

Your profile

- Academic degree in Computer Science, Information Technology, or equivalent experience
- Cisco Certified Network Professional (CCNP) or equivalent experience
- 3+ years of experience in network engineering, ideally with exposure to datacenter environments
- Experience in network design within enterprise environments
- Solid understanding of networking technologies and protocols (e.g., TCP/IP, routing & switching, firewalls)
- Experience working in complex, global infrastructures
- Ability to assess and deploy technologies to meet diverse business needs
- Basic understanding of ITIL-based service environments

Our offer

- 13th salary
- Performance bonus
