Network Engineer (DNS - DHCP) - Tires

工作职责

The Network Engineer DNS DHCP will be responsible to design, implement, and optimize our DNS DHCP service together with the service team.

The incumbent will be responsible for designing a secure, reliable, and efficient architecture for DNS DHCP that meets the needs of Continental Tires. Additionally, the role involves identifying synergies across other solutions within the Tires IT infrastructure portfolio to co-develop cohesive target designs.

Your main tasks will include:

- Lead the redesign of DNS DHCP service to ensure it meets the evolving needs of Continental Tires and the industry.
- Work closely with internal and external stakeholders, including managed service providers, software and hardware vendors, technical teams, business units, to understand their needs and ensure the solutions align with their requirements.
- Continuously monitor and optimize the performance of DNS DHCP service to ensure high availability and reliability, drive optimizations and ensure that it complies with relevant security standards.
- Oversee and manage DNS DHCP related tools i.e. QIP.
- Conduct hardware patching and configuration of complex network infrastructure to maintain optimal performance and security.
- Driving escalation and problem management processes, coordinating complex incident and problem resolution with internal IT teams and external service providers.
- Prepare changes to the environment and maintain detailed documentation of network configurations, processes, and procedures.
- Steer external partners to ensure seamless integration and support of network services.

职位要求

- Academic degree in Computer Science, Information Technology or equivalent experience.
- Preferred Qualifications: CCNP or equivalent.
- Minimum of 5 years of experience in network architecture or a related role, with a focus on DNS DHCP.
- Strong understanding of DNS DHCP technologies and network security principles. Knowledge of network design, server management and IP addressing.
- Understanding of ITIL practices and the ability to manage the service lifecycle effectively (Proficiency in service management tools and software).
- Leading Project experience represents a plus.
- Fluent in English (spoken and written) min. B2 level
