

IT Consultant for Infrastructure APS Service Integration and Management -TM

Tus actividades

IT Consultant for Infrastructure APS Service Integration and Management is the counterpart of the service owners within the Infrastructure Agnostic Platforms & Solutions organization and has the following tasks:

- Ensuring that the current and future service requirements of customers or customer representatives are identified, understood and documented in the Service Level Agreement
- Negotiating and agreeing levels of service to be delivered with the customer or customer representatives and formally documenting these levels of service in SLAs
- Ensuring that service reports are produced for the supported services and that breaches of SLA targets are monitored, investigated and actions taken to prevent their recurrence
- Ensuring that service performance reviews are scheduled, carried out with customers regularly and are documented with agreed actions progressed
- Reviewing the service scope, SLAs, and other agreements on a regular basis, ideally at least annually
- Identifying all key stakeholders and customers for supported services
- Developing relationships and communication with stakeholders, customers and key users - defining and agreeing complaints and their recording, management, escalation, where necessary, and resolution
- Provider sourcing: responsible of driving the process of sourcing for external providers while maintaining a close collaboration with the internal service owner to properly identify and address the internal support needs. Reviewing service contracts and addendums and managing the lifecycle of the contracts.
- Provider onboarding: responsible of the onboarding (and offboarding) process of the external providers, aiming for a successful integration starting from accounts and access privileges to internal process onboarding and adherence.
- Provider steering: responsible of service delivery regarding problem solving and continual service improvement, lead service review meetings by measuring the service specific KPIs.
- Provider controlling: responsible of tracking and fulfillment of the monthly invoices reflecting the delivered services.
